

## Running Sheet: Fisheries Lectures | ANU 5<sup>th</sup> & 6<sup>th</sup> December

### **SESSION 1: *Introduction to Fisheries Management***

---

**Ice-breaker:** Speak to those next to you, introduce your job or your recent projects. Collectively, write down three things you are hoping to learn about this week.

**Activity (END):** Consider a fishery that you are familiar with. What are the major ecosystem impacts of that fishery?

Thinking about what you've learned, what could be done to reduce these impacts? Can you think of any other major management challenges for this fishery?

### **SESSION 2: *Fisheries Management Tools***

---

**Activity (END):** Consider a fishery that you are familiar with. List all of the stakeholders in the fishery. For each stakeholder, identify their key priorities.

See if you can identify points of conflict. Discuss ways to resolve that conflict, considering what you have learned about Ecosystem-Based Fisheries Management.
